

Confidentiality Request Questions and Answers (47 CFR § 0.459)

(1) Identification of the specific information for which confidential treatment is sought

Rockwell Collins requests confidentiality for the following attachments (exhibits) for the experimental license application: Narrative Statement and the Directional Antenna Information.

(2) Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission

This information was submitted with the experimental license application for FCC File Number: 0253-EX-PL-2007.

(3) Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged

The information included in the attachments is proprietary because it includes the design and use of the system. This information will not be made available to the public.

(4) Explanation of the degree to which the information concerns a service that is subject to competition

Other companies are developing similar technology that they are trying to sell to the government.

(5) Explanation of how disclosure of the information could result in substantial competitive harm

This information, if disclosed, could be used by our competitors to develop the same or a similar system.

(6) Identification of any measures taken by the submitting party to prevent unauthorized disclosure

RCI has only provided information concerning this system to the potential user community. All presentations have been clearly marked with proprietary labeling. We are also using a dedicated secure (locked) laboratory to perform development activities.

(7) Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties

There has not been and will not be a public disclosure of this system. The extent of disclosure is as stated in the answer to question #6 above.

(8) Justification of the period during which the submitting party asserts that material should not be available for public disclosure

The material should be permanently withheld from public disclosure. Rockwell Collins intends to continually develop and refine the system for at least the next two years (this time period would be extended, if Rockwell Collins receives a contract).

(9) Any other information that the party seeking confidential treatment believes may be useful in assessing whether its request for confidentiality should be granted
