Exhibit II

Modulation Signal:

Please provide the following information, as appropriate, for the Modulating Signal:

Maximum speed for keying in bauds:

N/A

Maximum audio modulating frequency:

N/A

Frequency deviation of carrier:

N/A

Pulse duration and repetition rate:

0.45 microsecond pulses with a repetition rate max 6750 per second

0.5microsecond pulses with a repetition rate max 5600 per second

=> Maximum duty cycle of 0.58%

=> Operational duty cycle would be much less
