RE: SAMSUNG ELECTONICS, INC.
New Orleans, LA
New Orleans Convention Center (485 – 494MHz)

To whom it may concern:

Please be advised Comsearch has conducted a frequency study for the above referenced frequencies to operate at the CTIA Wireless Trade show at the New Orleans Convention Center. Our study indicates that no harmful interference will occur as a result of this operation.

The frequency range we are requesting overlaps TV channel 16 KADN(482 – 488MHz) and channel 17 WLPN-LP(488 – 494MHz). Channel 16 KADN operates out of Lafayette, Louisiana, which is over 200 miles from New Orleans.

Channel 17(WLPN-LP) is a low-power station that is licensed for the New Orleans metropolitan area. We have notified the applicant of our request. Since our operation will be limited to inside the New Orleans Convention Center, at the relatively lower power we are requesting, no harmful interference will occur as a result of its operation.

If you have any questions, or require additional information please feel free to call me at (703) 726– 5671, or email me at rhibbele@comsearch.com

Sincerely,

Richard W. Hibbeler
Manager
