Message:

Mr Lee,

In response to your inquiry of 7/16/2020, SRC's comments are as follows:

The SRC Inc. Truth Pod System is designed for tracking and providing real time and locally logged telemetry for any air or ground based target of opportunity. The system has two components, remote unit or pod and a base station. The basic micro pod is a very small unit that provides basic GPS, RTC, SD card logging, battery, and low power RF modem. The pod communicates over a 900MHz radio modem to the base station. The radio modems can be configured for point to point or point to multipoint communications to allow multiple pods to connect to each base station.

Regards,
Anthony Cimo
