

FCC Application for Experimental STA

File Number: 1066-EX-ST-2015

Exhibit 1: Information on Experiment

Purpose of Experimental STA Request

SRC is requesting an Experimental Special Temporary Authorization for the purpose of radar testing in a semi-arid environment. Our requested dates are for a period ranging from November 16, 2015 – November 20, 2015.

Locations

SRC will be operating up to one (1) SRC-3554 Radar between the following location:

Location	Latitude/Longitude	Radius of Operation	Number of Radars
Crows Landing, CA	37°23'60.00"N 121° 6'27.00"W	10 km	1

SRC-3554 Frequency Requirements

A single SRHawk (SRC-3554) radar requires only one frequency within the 16.21-16.5 GHz operating band of the system to operate. Our experiment will utilize:

Location	Number of Radars to be used (up to)	Number of Frequencies used per Radar	Total Frequencies needed for Experimental STA
Crows Landing, CA	1	1	1

Operating Schedule

The operating schedule SRC will use for the SRC-3554 Radar during the course of the Experimental STA grant is:

Schedule Times	Date
Start Date of Experiment	November 16, 2015
Stop Date of Experiment	November 20, 2015
Daily Operation during Experiment	Intermittently Up to 24 hours per day

Interference Mitigation

The SRC-3554 radar can blank transmissions from 0 and 360 degrees in azimuth if necessary to protect other services that may be operating.

Cease Buzzer Point of Contact

SRC understands that operation will be on a secondary non-interference basis. In the event interference complaints were to occur, SRC has taken preventative measures to cease and desist from transmission until they can be resolved. SRC has established a Cease Buzzer point of contact to quickly react with any interference complaints that are the result of our system. The point of contact for the SRC Cease Buzzer is:

Point of Contact	Telephone Number
Cease Buzzer	Primary: (315) 436-6711 Secondary: (315)-452-8114
