Subject: Request for Info - File #0337-EX-PL-2013

---

Message:

Hello,

I have revised SRI application for a temporary experimental license for our airborne radar system to exclude the FAA frequency band (328.6-335.4 MHz). Now, our radar will operate between 210 to 325 MHz and 340 to 430 MHz.

Development of this radar system is being done under government contract number W912HZ-09-C-0078.  
The government point of contact is:

Andre St. Louis  
Project Officer/Contracting Officer Representative  
USACE/CRREL  
(603) 646-4105  
andre.j.stlouis@usace.army.mil

The change in frequency and government point of contact have been incorporated into a new version of the system description document attached to the application.

Thank you.  
Ryan Peterson
