TechEdSat

Ali Guarneros Luna

16 August 2013

Dear Ali

Thanks you for the frequency coordination request and your call today. The panel discussed your request in detail some time back . We have now coordinated the frequency as follows:

Downlink 437.465 MHz (Beacon)

You have not indicated a final launch date. Once the final date is available please advise us. Please also advise us if there are any other satellites operating on Amateur frequencies on the same launch. You are responsible for ensuring that other satellites on the same launch are not on the same frequency coordinated for TechEdSat and advise us as soon as possible so that interference issues can be resolved before launch.

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on www.iaru.org/satellite, it will assist you to comply with the ITU requirements for Amateur satellites.

Please also read the attached "controlling satellites" document.

Best wishes for a successful project. Please keep us informed of developments and progress.
