Subject: Request for Info - STA File #0493-EX-ST-2013

---

Message:

Q1) Does the UHF beacon on the satellite have the capability of being shut down when in view of any early warning radar?

A1) The UHF beacon can be shut down any time we are requested to do so by a radio spectrum user of higher priority.

Q2) Provide stop buzzer contact information and schedule of use.

A2) To request termination of UHF transmission, contact any one of the following at any time:

Ali Guarneros Luna	408 886 1926
Kevin Ramus	208 651 6358
Marc Murbach	510 290 3158

The UHF transmission will initiate upon insertion into orbit and will continue until terminated by one of the above contacts or other mission control staff, or by on board software, or by de-orbiting of the spacecraft.
