

Modification Request November 1, 2014.

This requests a modification to 0091-EX-ML-2013. The modification adds two antennas at the same location:

SCU 3M-A, a second antenna and transceiver identical to the one originally licensed;

SCU 2.4M, a third antenna and transceiver identical to the one originally licensed, except the diameter is 2.4 meters rather than 3 meters. The EIRP for this antenna is 61 dBm, all the other specifications are the same as for the two 3 meter antennas.
