

Modification Request February 3, 2015.

This requests a modification to 0091-EX-ML-2013.

This license currently supports operation of the SCU 2.4M antenna, along with others, at the SCU campus.

The modification allows operation of the SCU 2.4M, at a location about 10 miles away, at Moffett Field.

The physical characteristics of the antenna and transmitter will not be changed from what is currently licensed. The maximum height of the top of the antenna above the ground, is 15 feet.
