

This STA Application, number 0764-EX-ST-2016, is for extension of STA 0801-EX-ST-2015. This has been done because the launch has changed, and thus the deployment date from ISS and initiation of operation have changed.

The deployment from the ISS occurred May 11, 2016, and the mission is currently operating under STA 0801-EX-ST-2015, which expires July 1, 2016. Therefore the operating period for this STA is requested to run until November 30, 2016. All other aspects of the STA would be unchanged from those of 0801-EX-ST-2015.
