

The International Amateur Radio Union

Since 1925, the Federation of National Amateur Radio Societies
Representing the Interests of Two-Way Amateur Radio Communication

PhoneSat V2

30 December 2012

Carmen Victoria KJ6KRW

Dear Carmen

Thank you for the frequency coordination request. The panel has discussed the application for satellite frequency coordination. We have coordinated the following frequencies.

Downlink 437,425 MHz
Downlink/Uplink 24012 – 2.4312 GHz

You have indicated the launch date as July 2013. Please let us know when you have the final date. Please also let us know if there are any other satellites operating on amateur frequencies on the same launch.

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on www.iau.org/satellite, it will assist you to comply with the ITU requirements for Amateur satellites.

Please also read the attached “controlling satellites” document.

Best wishes for a successful project. Please keep us up to-date with developments.
