In answer to the question regarding use on a Government contract

Government Agency: Army Research Development & Engineering Command
Acquisition Center

Contract Number: W91CRB-04-D-0015, DO 19

Project Description: Agent, Defeat, Denial, Disruption - The intent of the Research in Agent Defeat, Denial, Disruption (AD3) program is to develop concepts that will defeat, disrupt, or provide denial to facilities that produce or store chemical and biological agents while minimizing the collateral threat due to the release of agent. This research program addresses critical technical issues associated with achieving that goal, including: assessment of potential AD3 concepts, modeling of the deployment and effects of AD3 concepts, and support for experiments to substantiate the implementation and effectiveness of AD3 concepts.
