Subject: Request for Info - STA File #1271-EX-ST-2016

---

Message:

Sirs,

We have send multiple e-mails to Globalstar (see below) about the coordination request. They answered one e-mail acknowledging our request, but they have taken no actions and not responded to all of the other e-mails.

We would like to remove these frequencies (2481 to 2495 MHz) from our STA application to avoid having our application rejected or incurring more delays. What is the process to remove these frequencies from our STA?

Thanks,

--Mark
