EXHIBIT A

Question

Number 6 - Yes

- The authorization is required to support the interdiction of unauthorized mobile devices within a secure, private and or restricted area. The objective is to limit, control and manage cellular communications to commercial communication providers. **Scope of Spectrum Usage Rights.** The Spectrum Usage Rights will be utilized by Lessee as a Private Mobile Radio Service (“PMRS”) to manage access to the Commercial Mobile Radio Service (“CMRS”) within the scope of the Spectrum Usage Rights as defined herein. Lessee shall operate the Leased Spectrum as a PMRS operator in compliance with the Communication Laws or any other applicable law as if it is solely responsible for such compliance.

Number 8: 24 Months

- We have completed 4 pilots with the objective and used 6 month STA and one 442. We are in the process of installation of two permeate installations which will be completed in late 1st Qtr. of 2013. Once completed and configuration is completed, we will submit products for FCC Certification/Type Acceptance and estimate that it will take estimate 6-9 months to complete the full process. Our goal would be to receive all the required FCC certifications by end of 1st Qtr. 2014 if not before.
