

We, in Siemens ICN are seeking the FCC permission to use the following frequency ranges to carry out experimental testing for wireless communications.

For FDD (Frequency Division Duplex), we require

1930 - 1935	for Uplink direction
2120 - 2125	for Downlink direction

This is part 22 of the FCC guidelines.

For TDD (Time Division Duplex), we require

2010 - 2025	for uplink and downlink
-------------	-------------------------

Thank you very much
