We, in Siemens ICN are seeking the FCC permission to use the following frequency ranges to carry out experimental testing for wireless communications.

For FDD (Frequency Division Duplex), we require

          1930 - 1935   for   Uplink direction
          2120 - 2125   for   Downlink direction

This is part 22 of the FCC guidelines.

For TDD (Time Division Duplex), we require

          2010 - 2025   for   uplink and downlink

Thank you very much
