Subject: File Num#0125-EX-CN-2020 reminder on MAG pre-coordination data request

---

Message:

Hello,

I believe the reason a MAG coordination letter required is being flagged was the nature of my wideband request of 20 mhz to 1 Ghz. This was due to the amount of frequencies requested (220). If you look at the exhibit I attached to the 442 request we do not need anything in the 225-400 Mhz range. If I am in error please advise.
