

This frequency radiation request required to complete testing of a demonstration system contract with the U.S. Air Force. The system is a differential GPS broadcast station that broadcasts corrections identical to and in compliance of the FAA LAAS (FAA-2937) requirements. It is only necessary to operate on one or two frequencies within the 108.1 to 117.75 MHz band so if it is necessary to change the requested frequencies that will not be a problem.

The contract number for this program is TP-00481100-N-02-EOBS-0A(U)
