

## **EXHIBIT**

### **Frequency and Contract Information**

Applicant Sierra Nevada Corp., under a contract with the U.S. Army in connection with the Army's EMARSS program, seeks special temporary authority for testing, research and demonstration of installation and integration of equipment manufactured by Harris Corp.

While eight specific frequencies were selected for use in the attached application for STA, applicant would be willing to use alternate frequencies as follows:

30-40 MHz Band: one frequency in the low range of this band, and one frequency in the high range.

140-160 MHz Band: one frequency in the low range of this band, and one frequency in the high range.

440-470 MHz Band: one frequency in the low range of this band, and one frequency in the high range.

750-850 MHz Band: one frequency in the low range of this band, and one frequency in the high range.

The Army Contract Number for this project is W911QX-15-C-012.
