To operate within the 2200-2290MHz and 4400-4940MHz Telemetry Bands in Los Angeles, California.

ATTN.: Microwave Branch

Silvus Technologies, Inc. hereby requests Special Temporary Authority (STA) to operate within the 2200-2290MHz and 4400-4940MHz telemetry bands pursuant to Section 21.25 of the Commission's Rules. Silvus Technologies, Inc. requests that the Commission grant it temporary authority to operate on the frequencies centered on 2210MHz, 2235MHz, 4410MHz and 4440MHz with 20MHz bandwidths from April 01, 2019 through May 15, 2019 with intermittent usage. As explained below, Silvus Technologies, Inc is filing an STA request to demonstrate data coherency in a MIMO / MANET configuration for a US Army contract requirement. Silvus Technologies, Inc., submits that there are extraordinary circumstances warranting a grant of the STA request.

Silvus Technologies, Inc., is seeking to demonstrate contractually required Mobile Ad-Hoc networking testing in congested and contested environments with regard to data coherency, propagation, data throughput, vehicle integration and impact utilizing various IP sensors for a US Army contract. Due to the extreme frequency congestion within the Southern California Area, Silvus Technologies, Inc. requests the use of these channels.

Silvus Technologies, Inc. certifies that the operation of the requested channel for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA for the 2.2GHz and 4.4GHz bands would serve the public interest by enabling Silvus Technologies, Inc., to demonstrate the reliability of their emission scheme as it relates to transmitting and receiving consistent data remotely. The proposed service would enable the demonstration of the Streamcaster SC4200 / SC4400 transceiver / antenna array in a terrestrial exercise.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
