In re Application of

Silvus Technologies, Inc.
10990 Wilshire BLVD., Suite 1500
Los Angeles, California 90024

To operate in the 2360-2390MHz Telemetry Band around Woodbridge, Virginia.

ATTN.: Microwave Branch

Silvus Technologies, Inc., hereby requests Special Temporary Authority (STA) to operate within the 2360-2390MHz telemetry band pursuant to Section 21.25 of the Commission's Rules. Silvus Technologies, Inc. requests that the Commission grant it temporary authority to operate on the frequency centered at 2380MHz with a 20MHz bandwidth from August 21 through August 26, 2016 with intermittent usage. As explained below, Silvus Technologies, Inc., is filing an STA request to demonstrate microwave technology utilizing Wescam's MX-10 gyro-stabilized sensor for the U.S. Marshal's Service on an aerial platform flying between Woodbridge and Manassas, Virginia. Silvus Technologies, Inc., submits that there are extraordinary circumstances warranting a grant of the STA request.

The U.S. Marshal's Service have invited Silvus Technologies, Inc., to demonstrate new microwave technologies using Wescam's MX-10 gyro-stabilized sensor. Due to the extreme frequency congestion in the Washington, D.C. area, coupled with the added congestion from traditional Television and News coverage of area events, Silvus Technologies, Inc., requests the use of this channel.

Silvus Technologies, Inc., certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA for the 2.3GHz band would serve the public interest by enabling Silvus Technologies, Inc., to demonstrate the reliability of their emission scheme as it relates to Wescam's MX-10 gyro-stabilized sensor. The proposed service would enable a demonstration of the Streamcaster SC4200 transceiver on an air-to-ground-based exercise. Silvus Technologies, Inc is in the process of obtaining the consent of the relevant frequency coordinators for this project, including AFTRCC. AFTRCC has indicated its intent to forward the results of the coordination to the Commission.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:

Applicants Name:	Silvus Technologies, Inc.
Address:	10990 Wilshire BLVD., Suite 1500 Los Angeles, California 90024
Type and Manufacturer Of Equipment:	Streamcaster SC4200
Power Output:	10W
ERP:	16W
Emission:	20M00D7W
Frequency:	2380.0MHz, 20M00D7W @ 16W AERIAL
Area of Operation:	30Km

Coordinates: N 38 39 33.89
W 077 15 00.87

Antenna Height: **MANNED FIXED WING @ OR BELOW 3000' AGL**

Antenna: 2dBi Dual polarized /sector

Antenna Gain: 2dBi

Dates of Operation: August 21, 2016 – August 26, 2016
(Intermittent Usage during these days)

Silvus Technologies, Inc., requests an STA to operate on the above-referenced frequency for a period not to exceed six months. No application for regular authorization will subsequently be filed.

Silvus Technologies, Inc., certifies that no party to the application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C § 853(a).

Should you have any questions regarding this matter, please contact, John Winch, by telephone 626 676 1470.

Respectfully submitted,

By: John Winch
Frequency Coordinator
