Subject: FCC File No. 0357-EX-PL-2007

This letter is in response to your correspondence date September 13, 2007 concerning an application for an experimental license by Sirius Satellite Radio.

The out-of-band emissions for the frequency band 2320-2332.5 MHz will attenuate transmitter EIRP by $75+10\log P(\text{EIRP})$ dB.

On the issue of coordination with AFTRCC, Sirius will coordinate all transmissions with AFTRCC under this experimental license and ensure that no transmissions will occur within line of sight of installations with AFTRCC facilities.

Please contact me if you have any further questions.

Regards,

Terry Smith
