EXHIBIT #1

QUESTION #7 EXPERIMENTATION DESCRIPTION

Applicant wishes to continue his commemoration of Major E.H. Armstrong's first experimental wideband FM broadcast from Alpine, New Jersey. Applicant is planning to recreate the Major's original Yankee Network system, in which wide band FM broadcast signals were sent via the Major's Alpine 42.8 MHz. transmitter to several receiving sites located throughout New England. This process could involve some considerable time and effort, and the applicant wishes to ask for an experimental license of at least 5 years to allow the work to take place.

The original commemoration was conducted under FCC STA File Number 0119-EX-ST-2005 and Call Sign WA2XMN. The applicant wishes to retain the WA2XMN Call Sign on the new experimental application, if possible.

The equipment and antenna used will be the same as used in the original STA mentioned in the above paragraph.
