Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear FCC Licensing,

The renewal of Call Sign WF2XUJ with FRN 0020909917 is from Southern Methodist University. Associate Professor Joseph Camp is the contact for this FRN. The FCC Experimental License and subsequent renewals are for the purposes of wireless networking and communications research projects, which are funded by the National Science Foundation. Descriptions and award documentation of both of the relevant NSF projects have been included in the renewal application.

Since SMU is a educational entity that is not providing a commercial, the renewal should qualify as fee exempt.

If you need any further documentation of these research projects, please feel free to contact Joseph Camp, whose contact information is below.

Best Regards,
Joseph Camp
