Subject: Request for Info - File # 0225-EX-CM-2019

---

Message:

Address the latest International Bureau issue:

"The applicant proposes to use 450.1-450.15 MHz for space research (Earth-to-space) and (space -to -Earth). The use of the 450.1-450.15 MHz band is not allocated for space research in the (space -to -Earth) direction. Therefore, an FCC and ITU SNL database search is necessary to determine if any frequency overlap or adjacent band interference may be caused in the downlink. Additionally, the use of this band is subject to coordination agreement under RR 9.21, therefore the CR tab should be completed rather than the API tab in the spacecap file."

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of October 03, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
