Subject: Request for Info - File # 0759-EX-CN-2017

Message:

NASA has rejected your requested use of 468 MHz. NASA Goddard Space Flight Center indicated they would be open to discussing a couple of options with Space Dynamics Lab to provide a way forward. This could be 1) establishing a support contract between Space Dynamics Lab and NASA Wallops Flight Facility (WFF) for NASA WFF to command and control the cubesat (so the scheduling issues could be addressed in-house), or 2) establishing a formal scheduling arrangement between Space Dynamics Lab and NASA WFF to try and facilitate mutually agreeable operations. Either way, one of these options needs to be agreed upon before any further action can be taken on the proposal.

Let the FCC's Experimental Licensing Branch know when a decision has been made.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of April 26, 2018 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
