Subject: Spacequest File # 0053-EX-ML-2003

"Amendment"

Dear Carl,

Attached is a draft attachment to our recently submitted license modification which I hope addresses the issues you discussed with Dino. Please let me know if it meets your requirements. If so, shall we formally submit this document on-line through the OET Licensing site, as Exhibit B, Coordination of Requested Frequencies, or is this e-mail attachment sufficient?

We also wish to delete use of the frequencies 455.225 MHz and 455.275 MHz which were authorized on April 1, 2003 (File # 0044-EX-RR-2003) as well as the frequencies in the bands 145.90 - 145.95 MHz and 145.950 - 146.00 which were submitted under the recent file number referenced above, leaving four requested frequencies (145.84 MHz, 145.86 MHz, 145.92 MHz and 145.96 MHz) in the current submission in addition to the frequencies previously granted.

Regards,

Linda Jacobsen

*(at least has dual use,
no comm ops in 145-147
using 145 to test ~~software~~
software for 147
