Form 442 question 7: Experimentation Description

- a. Proposed experimentation:** SpiderCloud Wireless, Inc, a startup corporation based in San Jose, CA is engaged in design of 3G Femtocell wireless products for enterprise applications. To that effect, we are showcasing/ demonstrating our products in the upcoming Intel Development Forum (IDF) showcase at Moscone Center in San Francisco, CA from Sept 7th thru 11th of 2014. To demonstrate our products, we would like to radiate inside Moscone Center at the address 747, Howard St, San Francisco, CA 94103. The units will be radiating in B2 (UMTS) and B4 (LTE) from the same access point.
- b. Objective:** To demonstrate our products in a convention center for the IDF showcase visitors.
- c. Contribution:** Indoor Femto cells have the potential to offload local voice and/or traffic from the outdoor macro cellular system.
