Subject: Reference Number: 28465 - File #0129-EX-ML-2015

Doug,

Spire Global, Inc. ("Spire"), formerly Nanosatisfi, has received your request for information for NTIA coordination parameters that are in addition to or different from those of 0041-EX-PL-2015.

Spire's modification application seeks authority only for the additional launch and operation of four satellites. Accordingly, the only material change is the response to inquiry 1B, regarding inclination angle, apogee in kilometers, perigee in kilometers, orbital period in hours and fractions of hours in decimal, and the number of satellites. All other technical parameters are the same as those previously provided in 0041-EX-PL-2015.

The revised response to 1B, which is limited to the launch and operation of the four new satellites, should be as follows:

"Atlas V: ORB, 51.6IN00500AP00500PE001.60H04NRT01"

Please let us know if you have any further questions.

Tony
