

Explanation of Transaction

Sprint Communications Company, L.P., a wholly owned subsidiary of Sprint Nextel Corporation (collectively “Sprint”), respectfully requests authorization to facilitate testing of wireless backhaul technology and equipment at Sprint’s campus in Overland Park, Kansas.

Sprint is specifically requesting authorization to temporarily transmit on the WCS A block frequencies (2305-2310/2350-2355 MHz) for testing purposes. NextWave Wireless, Inc. (“NextWave”) is the licensee of KNLB306, WCS Channel Block A in MEA029 – Kansas City, which includes Sprint’s Overland Park, Kansas campus where the testing will occur. NextWave currently has no operations in the vicinity of the Sprint Overland Park campus and has also provided their concurrence with the submission of this application.

Sprint’s proposed testing of new and innovative backhaul solutions using WCS spectrum will be conducted wholly within the Sprint campus. The tests will be used to evaluate backhaul solutions to support Sprint’s Network Vision and related broadband deployment initiatives.
