Subject: Request for Info - File #028-EX-PL-2016

Message:

We ran our link budget numbers again and our uplink C/N is estimated at 40.45 dB. I believe that the field in SpaceCap is limited to ≤ 30 dB, but our team has checked other published CubeSat link budgets and they are also reporting ≥ 30 dB C/N for uplink. Could you please advise on how best to proceed?
