

May 2, 2000

Federal Communications Commission  
Experimental Licensing Branch  
445 12<sup>th</sup> Street SW  
Washington, DC 20554

Gentlemen:

We just received licenses for new experimental stations and found that on four of them, one of the frequencies shown is not the one we had requested in our application. They are as follows:

WB2XGP	File Number 0035-EX-PL-2000
WB2XGQ	File Number 0036-EX-PL-2000
WB2XGR	File Number 0037-EX-PL-2000
WB2XGS	File Number 0038-EX-PL-2000

Please change 401.8855 on each of these licenses to 401.8885 and issue a new license to us.

I have attached a copy of each application we submitted to you. As you can see, we had requested 401.88850 MHz as one of the frequencies on all four. The frequency shown as 401.85850 MHz on each license is correct.

If you have any questions, please call Kayleen Burkhalter at (916) 657-6174.

Sincerely,

GLEN S. NASH  
CSA II
