Subject: Additional Information Request

---

Message:

Good morning Nimesh,

1) I have submitted a request to FAA to update the FAA coordination approval to reflect the manned aircraft-mounted radar transmitter will be operated between 500 and 1500 feet above ground (AGL). I will send their decision as soon as I receive it.

2) We have notched the CBRS band (3550-3700 MHz) and the FSS earth station band (3700-3800 MHz).

Thank you.  
Scott
