Subject: Request for Info - File # 0052-EX-TU-2018

---

Message:

Licensee has no other FCC licenses/authorizations except for two experimental special temporary authorities ("STAs") associated with Call Sign WL9XQV in San Jose, CA and Celebration, FL, which expire on November 18, 2018 (before the Pro Forma Changes will occur) and will not be renewed. Therefore, there are no other licenses in other services being review by other FCC bureaus in connection with the consolidation of Sunesys LLC into Crown Castle Fiber LLC, which will result in the pro forma change in direct and indirect ownership and control of Licensee.

However, while Licensee has affiliates that hold FCC licenses/authorizations, either those FCC licenses/authorizations do not require prior action by the Commission for the Pro Forma Changes, the Commission has already granted approval (See ULS File Nos. 0008391024 & 0008404814), or the pro forma intra-company transactions affecting those affiliate may occur at a different time from the Pro Forma Changes affecting Licensee. Therefore, this Application should not be tied to any application filed with another bureau.
