Subject: Request for Info - File # 0016-EX-TU-2020

---

Message:

The transaction involving T-Mobile U.S., Inc. and Sprint Corp was approved by the FCC on October 16, 2019. See Memorandum Opinion and Order, Declaratory Ruling, and Order of Proposed Modification, FCC 19-103, rel. November 5, 2019. In that decision, the FCC granted all pending applications that were on file requesting approval for the transfer of control. There are no pending applications at the Wireless Telecommunications Bureau, Media Bureau, or International Bureau requesting approval for the transfer of control.

The two experimental licenses that are part of this this application (11016-Ex-TU-2020) were first acquired by T-Mobile after the Commission approved the overall transaction (see citation above) but before the transaction has closed. Although the above FCC Order specifically states that the decision includes "authority for the pro forma transfer of control to T-Mobile, consistent with the terms of this Memorandum Opinion and Order and Declaratory Ruling, of: (a) any licenses and authorizations issued to any subsidiaries of T-Mobile during the Commission's consideration of the Applications and the period required for consummation of the transaction following approval" we have filed this application out of an abundance of caution to ensure that the records in ELS are complete and accurate. When the transaction closes, we will further update the records of each active experimental license to provide notification of consummation.

Please let us know if there are any further questions.
