Subject: Request for Info - File # 0582-EX-CN-2020

---

Message:

Submission has been updated as I didn't realize and Josiah showed me that I had to separate out the locations. The form is confusing as it is called the 'antenna.' This should help as we are developing and will test here and then coordinate a test event with NAVAIR at their PAX location. The FAA pre-coordination is confusing as that has not been required before and when we search the current FAA site regional coordination forms/documents are all listed as 'cancelled.' Can you help guide what the requirement is for this submission?

Last, we update the frequency to the exact range the design operates 9.5-10.5GHz. Thank you for the continued help and support!
