Subject: File Num#0582-EX-CN-2020 reminder on FAA pre-coordination data request

---

Message:

I am still working the FAA pre-coordination as this is new to TSC since it has not been required in the past. The FAA website is now allowing us to submit the request so we have made direct contact to the spectrum engineering of the FAA to ask for help on how we can pre-coordinate this SIR effort. I appreciate the support to keep this license request open as we will work with the FAA and submit this response asap. Any input or direct help or contact is appreciated. Thank you!
