Subject: File Num#0582-EX-CN-2020 reminder on FAA pre-coordination data request

---

Message:

Just had correspondence with Doug Young and since we tightened our frequency range he indicated to me that we do not require FAA coordination. I have requested help a couple of times, and this e-mail with him appears that we are clear on the submission. Can you let me know if anything else is required to complete the license? Thank you!
