

Program Description

- A. Tecore Networks continues to research, develop and test its niche commercial 2G, 3G, 4G LTE, and emerging 5G technologies.
- B. Validation of design and functionality to meet FCC and other agencies regulatory requirements.
- C. Since 1991, Tecore Networks continues to be on the forefront of small cell and rapidly deployable systems to be used by commercial and governmental purchasers. As a result of its continued efforts Tecore works to generate patentable, useful, cutting edge technologies.
