Message:

Mr. Trevino:

The instant application filed on behalf of Tecore Inc. is identical to the applications filed and licenses held for similar spectrum by Tecore's subsidiary company, AirNet Communications Corporation (see call signs WC2XUD, WE2XEY, KM2XOQ and WA2XSN) in Melbourne, Florida, but with a reduced operational radius.

You will note that the experiment description provided by Tecore is similar to the description in the AirNet applications. Indeed, the requested frequencies will be used in the normal course of the demonstration and development of the Tecore/AirNet products at Tecore's Columbia, Maryland facility. These uses are not related to the operation of any managed access or cell jamming operation in and around the Tecore facility or any prison within the requested operational radius. As such, and because any use of the authorized spectrum will involve prior coordination by Tecore (just as has been successfully employed by AirNet for many years), there will be no jamming or other interference with other authorized spectrum use in the area.

I hope that this clarification will position the application for immediate grant.
