Output is specified at the antenna terminals. The external antenna installation and operating configurations of this transmitter, antenna gain and cable loss must satisfy MPE categorical Exclusion Requirements of §2.1091. RF exposure compliance is addressed at the time of licensing, as required by the responsible FCC Bureau(s), including antenna co-location requirements of §1.1307 (b) (3). Users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.
