Subject:

Request for Info - File # 0011-EX-ML-2006

---

Message:

Mr. Young -

The nature of the modification request is for confirmation testing of passive UHF RFID tags we design here at our facility. The tags are being designed to address, with as few variations as possible, the coming worldwide demand for UHF EPC Gen 2 devices. The reason we would like to be able to test here with the ETSI and Japanese frequency bands is it is more efficient for us as our tag antenna designer is here.
