Question 4: Government Contract

Textron Aviation is developing multi-mission aircraft with a broad range of capabilities. The requested license is needed to support testing required under contract with the NRO, which is sponsored by SOCOM. The contract number is NRO000-18-C-0180.

The testing involves attaching an externally mounted, captive carry test article to the aircraft. The test article is equipped with a telemetry transmitter to provide real time monitoring and collection of data during flight.

Very Respectfully,

Dan Hankins
Spectrum Manager - Sr
Textron Aviation, Inc.
