

Exhibit 1

Summary of Modification & Notes

The purpose of the modification is to add 1 new GPS re-radiator in room 4005. This re-radiator will serve as Experimental RNSS equipment for the purpose of testing GPS receivers. All previously authorized re-radiators on this license will remain unchanged.

Additional attachments contain the equipment specification sheets, link budget showing compliance with NTIA criteria, a schematic for the proposed new re-radiator, an updated facility map showing the location in addition to the existing re-radiators, Point of Contact information for stop buzzer and Government contract information.
