Exhibit 1

Summary of Modification & Notes

The purpose of the modification is to add 4 new GPS re-radiators to provide coverage to additional areas within building 3. All of the re-radiators serve as Experimental RNSS equipment for the purpose of testing GPS receivers. All previously authorized re-radiators on this license remain unchanged.

Additional attachments contain the equipment specification sheets, link budget showing compliance with NTIA criteria, a schematic for the proposed new re-radiators, a facility map, Point of Contact information for stop buzzer and updated Government contract information.
