

## Exhibit 1

### Summary of Modification & Notes

Several modifications to Experimental License WE2XEZ are proposed in this application and are listed individually below:

1. **Station Location #1:** Re-radiator system in Room 3267 is no longer in place. The laboratory it supported was dismantled and converted to office space.
2. **Station Location #13:** Need to modify the coordinates for Room 4005 to accommodate relocation of the test station. New coordinates will be 42-32-19 N Lat, 071-09-17 W Lon.
3. **Special Conditions #10:** Correct typographical error in contract number. The change is from 3EC1727/SEC8415 to 3EC1727/5EC8415.
4. **Add New Location:** New location is identified as Room 4006 (BCTM). This location is near to Station Location #13 and has the same coordinates due to the rounding to whole seconds of precision in the application. The hardware for this station was purchased under the Scorpion Contract.
5. **POC Information Updated:** An additional POC has been added to the list. His name is Wayne Marsland at 978-657-2987.

All previously authorized re-radiators on this license will remain unchanged.

Additional attachments contain the equipment specification sheets, link budget showing compliance with NTIA criteria, a schematic for the proposed new re-radiators and Point of Contact information for stop buzzer and request for modification of condition #10.
