

Exhibit 1 to STA 0894-EX-ST-2014

1 Oct 14

MEMORANDUM FOR RECORD

SUBJECT: Required Frequencies for Experiment

1. While there are six center frequencies listed in the STA, we do not need them all to conduct a successful experiment.
2. We require any TWO (2) of the six listed center frequencies in the STA, regardless of band overlap, for a successful experiment. We would prefer to have full flexibility for experimental purposes, but if needed to deconflict with other stations in the area, we can reduce the number of center frequencies available to us.
3. POC is Wayne Jerzak, 781-271-3033, wjerzak@mitre.org
