ARMADILLO

Glenn Lightsey

24 May 2012

Dear Glen

Thank you for the frequency coordination request. The panel has discussed your request in detail. We have coordinated the following frequencies for your project:

Downlink	437.525 MHz
Uplink	145.950 MHz

You have not indicated when you expect to launch. Please advise us of the date when this becomes available as well as which other satellites operating on frequencies in the amateur service will be on the same launch.

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on www.iaru.org/satellite, it will assist you to comply with the ITU requirements for Amateur satellites.

Please also read the attached "controlling satellites" document.

Best wishes for a successful project. Please keep us informed of developments and progress.
