---

Message:

Theia has amended its requested frequencies in the Boardman, OR, and Syracuse, NY, areas to reflect the necessary 27.7 MHz bandwidth. Theia will coordinate these revised requested frequencies with the FAA and upload the coordination materials once that process is complete. No amendment to, or re-coordination of, the frequencies requested in the Fort Drum, NY, area is necessary because the frequencies requested in that area provide sufficient bandwidth for 27.7 MHz transmissions.
